

New Rider App

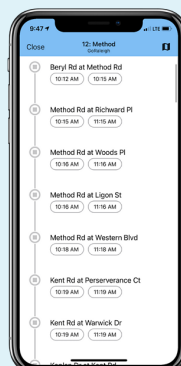

A Unified, Accessible Rider Experience

The TransLoc Rider app is a multi-modal solution that brings your **Fixed Route and OnDemand services into one app** with a built-in trip planner. It is multilingual, WCAG 2.0 AA accessible, allowing riders to plan, track, and receive service notifications directly on their smartphones.

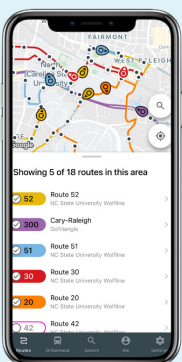

ONDEMAND FEATURES

- Single interface allows passengers to book and track their rides
- Real-time tracking of vehicle arrival notifications
- In-advance ride scheduling
- Re-book past trips with ease
- Proprietary algorithm automatically groups rides, balancing ride time and wait time for riders across the system

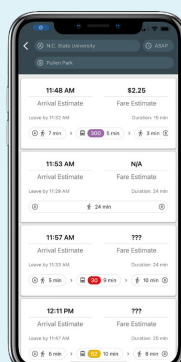

Route Detail List View

FIXED ROUTE FEATURES

- Real-time tracking and vehicle arrival notifications
- See vehicle capacity
- Receive dynamically suggested routes based on location
- See ETAs and scheduled arrival times
- Access critical details from the route and stop alerts
- Favorite bus stops for quick access
- Arrival alerts

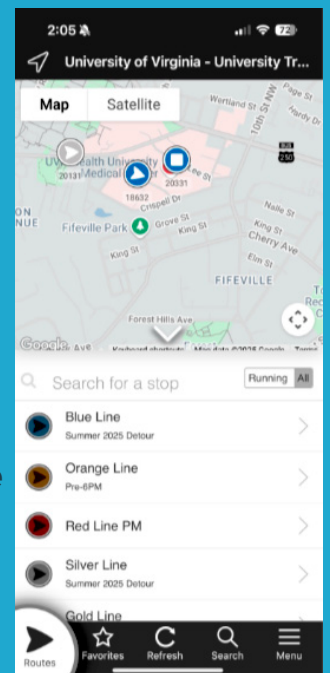

Built In Trip Planner

Important Update!

The **RideSystems** app will be discontinued as of August 31, 2025. Update your rider app today!
