

RADIO AREA OF CONCENTRATION, BROADCAST MEDIA PRODUCTION: 309A

Total Credits: 60

Catalog Edition: 2019-2020

Program Description

(R): 309A

The Radio Program is a career-focused degree designed to teach video and audio production skills through hands-on, experience-based classes in radio, sound and podcast production. Students develop technical skills, writing skills, aesthetic values, and professional attitudes, supported by highly committed faculty with practical experience in the field of production. The attainment of these skills is demonstrated in a digital portfolio designed to support a job search. Knowledge and skills learned through this program will be of value in commercial, industrial, interactive and educational media production and distribution.

A strong academic core combines a liberal arts education with specialized career courses. This offers the graduate the alternatives of entering the field or continuing in an institution of higher learning. The curriculum is offered for high school graduates pursuing careers in sound production as well as those employed in the video production field. Completion of all curriculum requirements will lead to the award of the Associate of Applied Science (AAS). A student interested in any of the Broadcast Media Production AAS or certificate curricula should consult an academic advisor in the Department of Media Arts & Technologies for assistance in making course selections.

Program Outcomes

Upon completion of this program a student will be able to:

- Record Professional audio in studios, announce booths and on location with a variety of microphones and recording devices.
- Produce professional segments and programs of various lengths for the audio/radio/internet industry.
- Solve technical and logistical problems through planning and preparation to successfully meet production deadlines.

- Create a portfolio that reflects the rapidly changing structure of the radio and sound recording industry and its employment opportunities.
- Write successfully for broadcast and/or new media to engage, inform, or entertain, based on audience research.
